How to Use Google Classroom on Mobile/Tablet

There are two procedures for using Google Classroom in Mobile/Tablet.

- a. Using any browser except chrome i.e. Mozilla Firefox
- b. Configuring app on Mobile/Tablet.

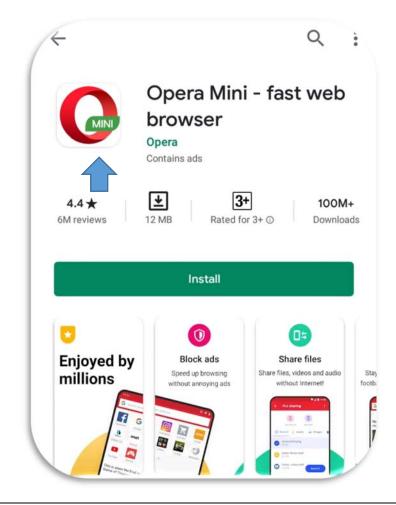

Please follow the page to see step by step method of both procedures:-

Procedure 1:- Using Browser to access Google Classroom.

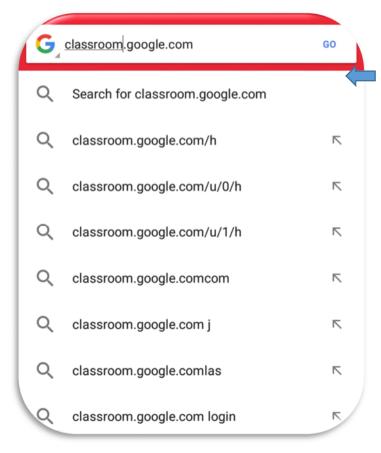

Open Your Mobile's Playstore.

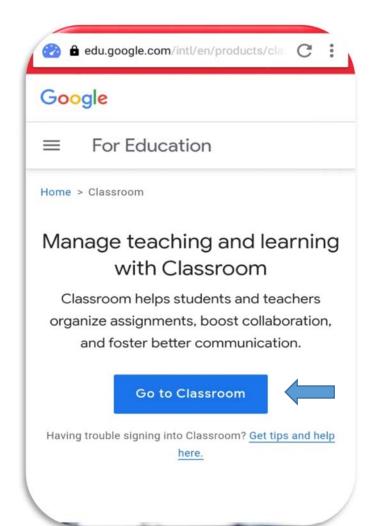

1.1

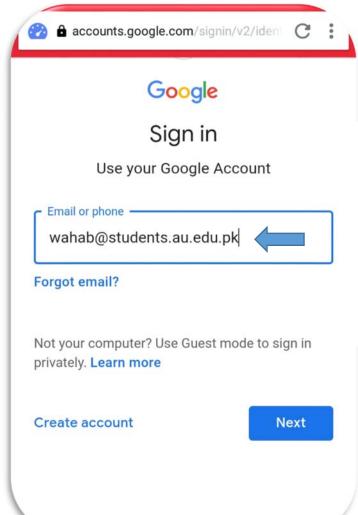

Type Opera/ Mozilla Firefox, as in picture Opera is searched

After
downloading
and
installation,
Open browser
and type the
url as in picture
"classroom.go
ogle.com"

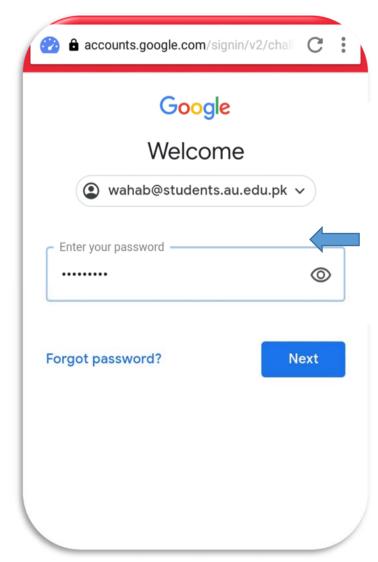

After typing url, press enter. It will take you to this page. Tap on "Go to Classroom"

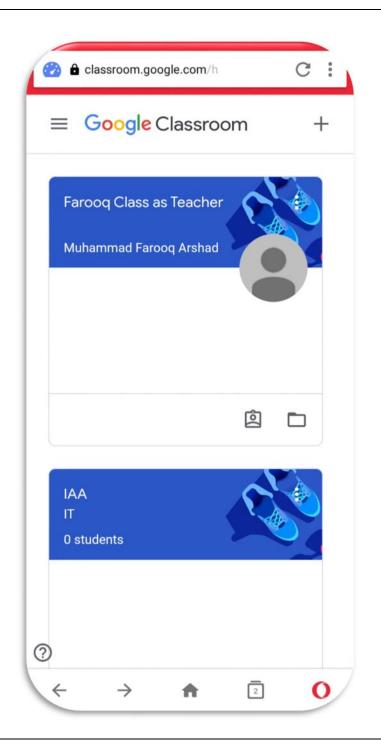

After tapping on
Go to Classroom, It
will redirect you to
"Sign in" Page,
Give your
University/College
ID here and Tap
Next.

1.5

After "Sign in"
Page, Welcome
Page is appear,
Type the
password which is
provided by
University's IT
Department.

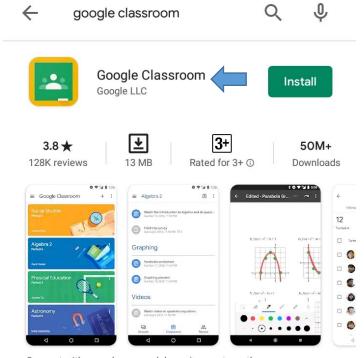

After giving your ID and Password, You will be redirected to your Google Classroom's Page. As you can see the picture. At this page you can see your classes. For Materials, Announcements, Quizzes, Assignments etc. Tap on the Class and go into your class, from there you can find all above.

For Procedure 2, Follow the Next Page

Procedure 2:- Configuring App in Mobile/Tablet for accessing Google Classroom.

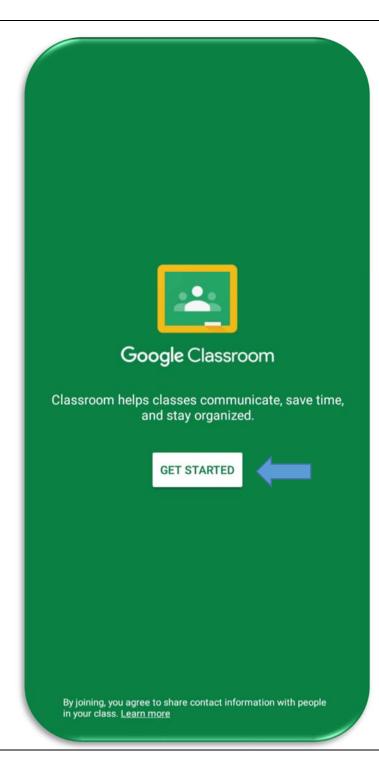

Go to Mobile's Playstore 2.1

Connect with your classes and do assignments on the go.

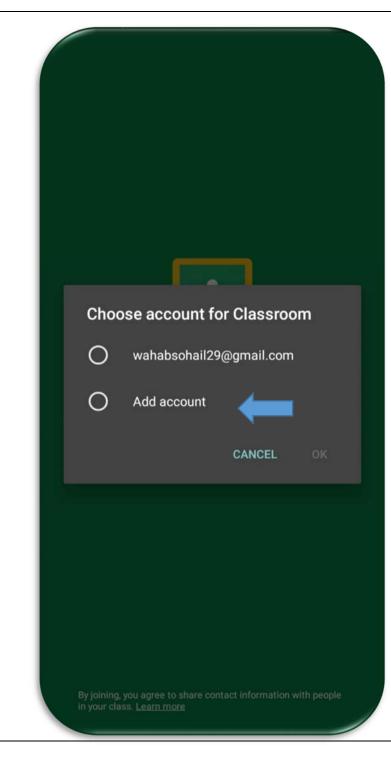

- - -

Type Google Classroom and install it.

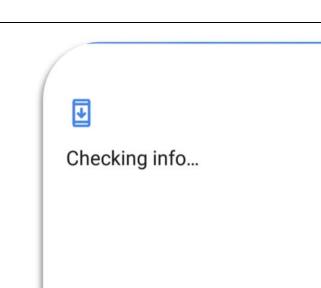

After
installation,
Tap to Open
Google
Classroom. Tap
to Get Started

2.3

After Tapping on
Get Started,
intimation
display for
account. Tap on
"Add account"
and Ok.

on Ok.
Checking Info
screen
appears. It
lasts for some
time.

Type your password and Tap Next.

2.7

Hi Wahab Bin

We publish the Google Terms of Service so that you know what to expect as you use our services. By clicking 'I Agree,' you agree to these terms.

You are also agreeing to the Google Play Terms of Service to enable discovery and management of apps.

And remember, the Google Privacy Policy describes how Google handles information generated as you use Google services. You can always visit your Google Account (account.google.com) to take a Privacy Checkup or to adjust your privacy controls.

Tap on I Agree.

2.8

wahab@students.au.edu.pk

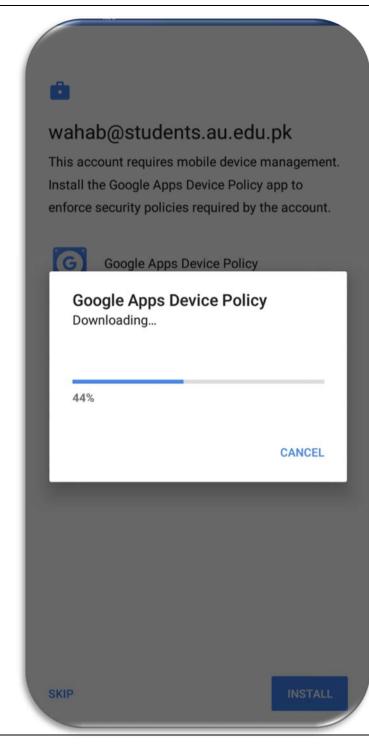

This account requires mobile device management. Install the Google Apps Device Policy app to enforce security policies required by the account.

Google Apps Device Policy

Tap to Install.

2.9

Device Policy app starts to download.

2.10

SKIP

INSTALL

Device Policy

Do you want to install this application? It does not require any special access.

After completing downloading, Install button reappears, Tap to Install.

2.11

Google Apps Device Policy

wahab@students.au.edu.pk

Tap on Next. 2.12

This application allows administrators to enforce policies on how your mobile device is used to access work information. If you are using Gmail or Google mobile apps for personal reasons, you don't need this app.

To keep your data secure, it also allows the admin to remotely wipe data, while you can reset your screen lock code remotely or locate a lost device.

This application requires phone permission so that it can retrieve the serial number of the device.

Some device details will be shared with administrators

VIEW DETAILS

Use of this application is subject to the Google mobile terms of service and the applicable G Suite terms of service for your organization.

Google Apps Device Policy

wahab@students.au.edu.pk

This application allows administrators to enforce policies on how your mobile device is used to access work information. If you are using Gmail or Google mobile apps for personal reasons, you don't need this app.

To keep your data secure, it also allows the admin to remotely wipe data, while you can reset your screen lock code remotely or locate a lost device.

Use of this application is subject to the Google mobile terms of service and the applicable G Suite terms of service for your organization.

NEXT

Device Policy's Page came, Tap to Next. If there is intimation regarding Permission, Tap to Allow.

2.13

Create work profile

wahab@students.au.edu.pk

One place for your work apps

Your organization can manage and monitor all apps and data in your work profile. You control everything else on your device.

Learn more

✓ I don't want a work profile

NEXT >

If you don't add a work profile, your organization can make changes that affect your entire device.

By default Work **Profile option is** uncheck, Check it. Tap to Next. However, creating work profile is optional. In this case we are not creating separate profile.

Activate device administrator?

Google Apps Device Policy

Touch Activate to set this application as the device policy manager or touch Cancel to unregister.

Activating this administrator will allow the app Device Policy to perform the following operations:

- Erase all data
 - Erase the phone's data without warning by performing a factory data reset
- Change the screen-unlock password
 Change the screen lock password
- Set password rules

Control the length and the characters allowed in screen lock passwords and PINs.

Monitor screen-unlock attempts

Monitor the number of incorrect passwords entered when unlocking the screen, and lock the phone or erase all the phone's data if too many incorrect passwords are entered.

Lock the screen

Control how and when the screen locks

Set the device global proxy

Set the device global proxy to be used while policy is enabled. Only the first device admin sets the effective global proxy.

Set lock-screen password expiration

Change how frequently the screen lock password, PIN, or pattern must be changed.

Set storage encryption

ACTIVATE

CANCEL

UNINSTALL APP

After that,
Activation
screen
appears, Tap to
Activate.

2.15

Confirm Enforcement

wahab@students.au.edu.pk

The following domain policy settings will be enforced:

- · Device password must be set
- · Administrators will be able to remotely wipe the device
- Administrators will be able to remotely remove account from the device
- Administrators will be able to remotely provision wifinetworks

You can do the following actions on your device remotely:

- · Locate device on a map
- · Ring your device at high volume
- Reset your device password/PIN
- Lock your device

Tap to Enforce.

2.16

< CANCEL

ENFORCE >

Policies

wahab@students.au.edu.pk

Your device does not comply with all security policies set by your administrator. Please take action to resolve this.

Device password must be set

Touch to change password

View details

Administrators will be able to remotely wipe the device

Administrators will be able to remotely remove account from the device

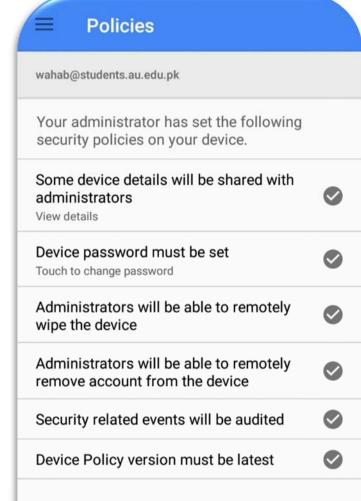

Security related events will be audited

Device Policy version must be latest

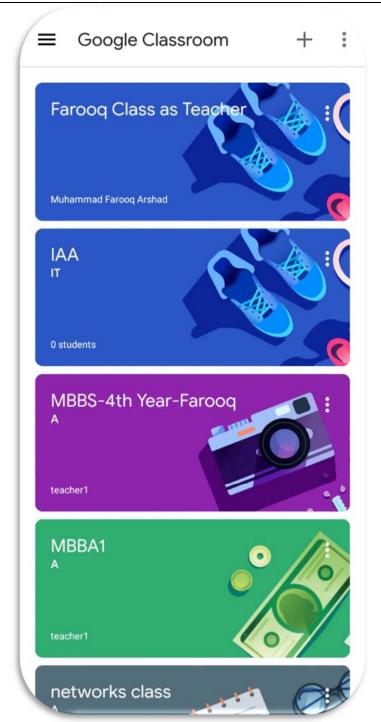

If there is no screen lock password, then this screen appears, as in my case. If in yours Tap to "Device password must be set" and make a password. This will be yours screen lock password now. Please remember the password and on safe hand write into somewhere because no one change the password except YOU.

Tap Next.

2.17

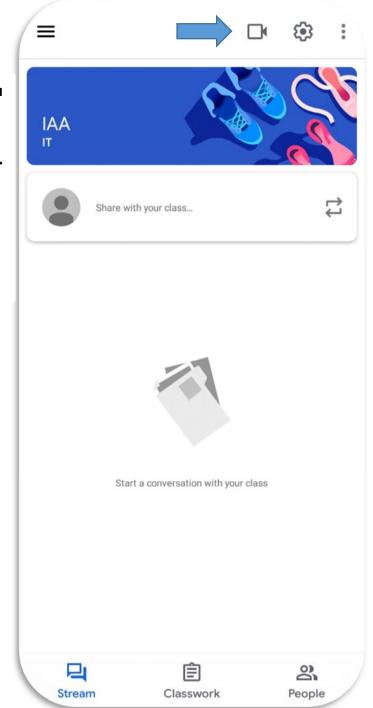

After setting password.
Tap Next.

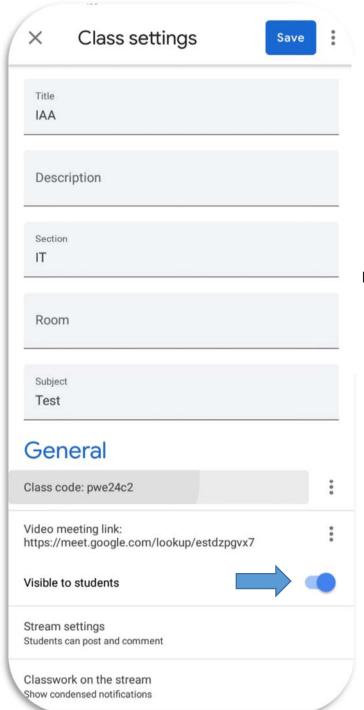

Yahooooo!!!!! You have successfully configured the Google Classroom. At this stage you can see your classes.

2.19

Tap on one class and you can see the materials, announcements, and msgs from teacher etc. On the top right corner there is button of Camera. This is **Google Meet** button. You can join the schedule class by just tapping on it. If this is not appears then follow the next figure.

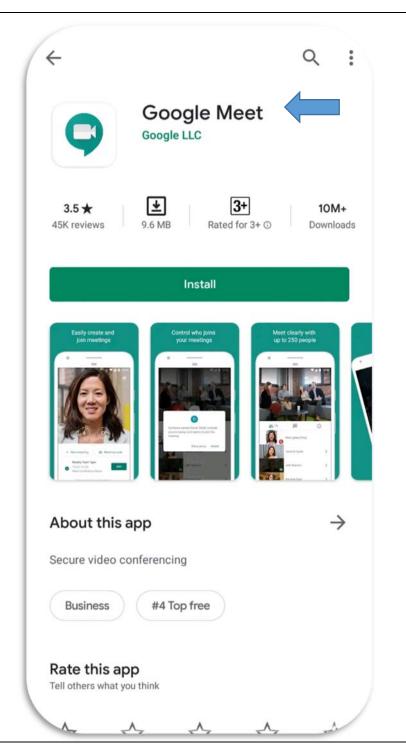

Go to Setting option, scroll down and in General swipe the button left to right to enable Google Meet option. Please remember Google Meet must be installed on your phone to use it. Please follow next figure to how to download it.

2.21

Go to Playstore.

Find Meet and install it.

2.23

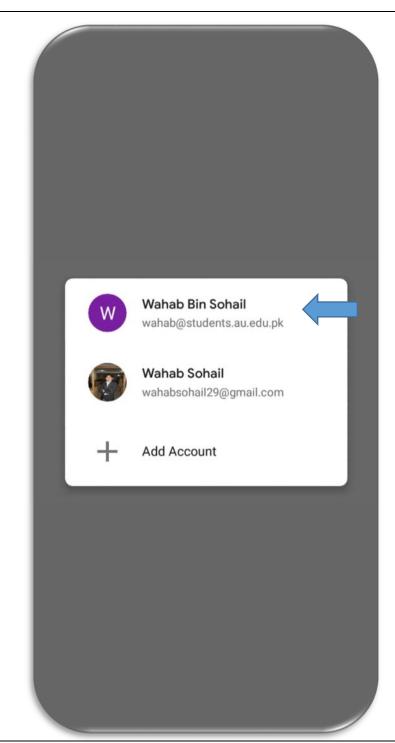

Welcome to Meet

To make video calls on Meet, allow access to your device's video camera and microphone

Terms of Service and Privacy Policy

Continue

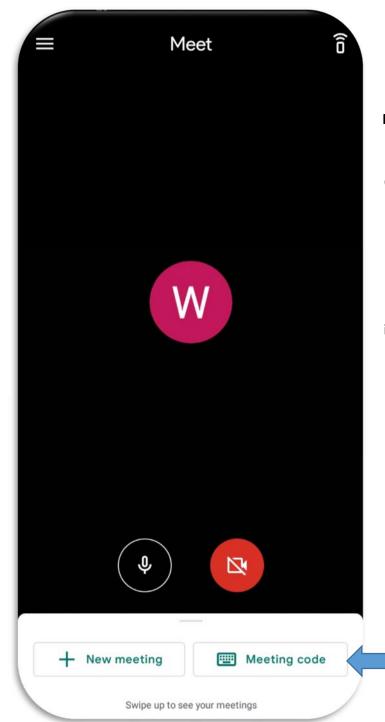

Open it and Tap to Continue.

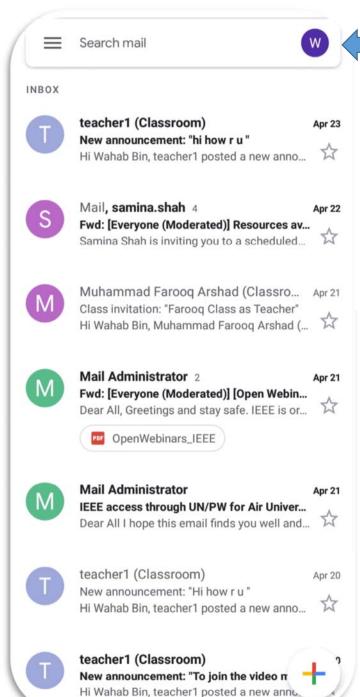

It will ask you from which account you want to configure Google Meet. Select the university's account. As in my case you can see wahab@students.au.

edu.pk

2.25

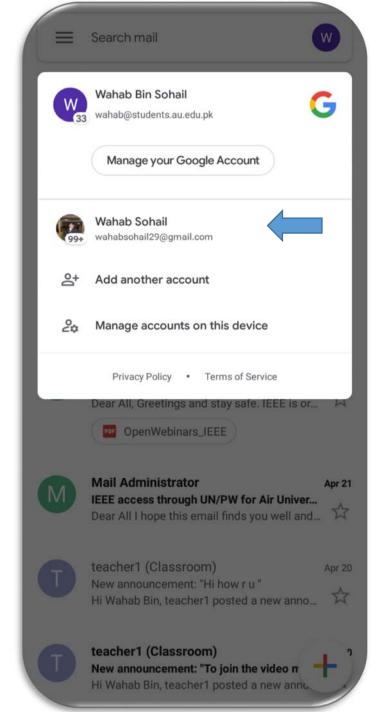

Now you've also configured Google Meet. Congratulations ...! You can join the class by typing Meeting Code or just tapping on Camera button in Class Preview as shown in previous figure (2.20).

Now your Gmail look like this. O wait, where is my Personal email. Ok don't worry you can see your both emails in same window. You want to see how? Check the next figure.

2.27

Just tap on the right top button "W" the first alphabet of your name. Tap your personal email and you will get through your personal email.

Again want to see university email.

Again tap on button then tap on university account, you will get your university email.
